-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 14-21, drawn to methods of detecting a cell proliferative disorder using an antibody, classified in class 435, subclass 7.1.
- II. Claims 22 (in part), 23, 25-42 (each in part), drawn to methods of treating a cell proliferative disorder comprising administering an antibody, classified in class 424, subclass 130.1.
- III. Claims 22 (in part), 24, 25-42 (each in part), drawn to methods of treating a cell proliferative disorder comprising administering an antisense sequence, classified in class 514, subclass 44.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are not disclosed as capable of use together and have different modes of operation and/or different effects. For example, the effect of the method of Group I is to diagnose disease, whereas the effect of the methods of Groups II and III is to treat disease. The methods of Groups II and III have different modes of operation, in that the method of Group II involves antibody therapy whereas the method of Group III involves gene therapy. The method of Group II involves

Art Unit: 1646

neutralization of a protein endogenous to a patient, whereas the method of Group III involves controlling gene expression in the patient. Therefore, search and examination of all three methods in one patent would present the examiner with an undue burden, since the methods involve different active agents and different methodologies, and require non-coextensive searches of the prior art.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, separate search requirements, and different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Elizabeth C. Kemmerer, Ph.D. whose telephone number
